PROFESSIONAL SUMMARY

Cybersecurity student in the ASU-UEL Dual Degree Cybersecurity Program, building practical skills in penetration testing, reverse engineering, digital forensics, and web application security through CTF competitions and labs. Motivated to bring strong analytical thinking, teamwork, and a growing Cybersecurity skill set to an internship in cybersecurity.

EDUCATION

Ain Shams University & University of East London (Dual Degree) *Expected 2028*

B.Sc. Computer Science – Cybersecurity Program | **GPA: 3.560 / 4.0 (B+)**

Relevant Coursework: Web Security, Data Structures, Operating Systems, Computer Networks, Logic Design, Object-Oriented Programming

EXPERIENCE

Cyberus - Network Penetration Testing Sector, Member *October 2025 – Present*

- Learned Linux and Networking fundamentals
- Learned about Encoding, Hashing and Encryption and how to use John the ripper to crack it.
- Learned bash scripting
- Learned about web attacks XSS, SQLi, and privilege escalation
- Perform hands-on exploitation exercises using HackTheBox (HTB) and TryHackMe (THM) labs

Cyberus - Student Cybersecurity Summer Training *August 2025 – September 2025*

- Completed intensive summer training covering cryptography, web exploitation, digital forensics, and reverse engineering using Ghidra
- Placed 4th out of 10+ teams in a university-level Capture the Flag (CTF) competition as part of a 5-member team and specialized in reverse engineering

ACM Competitive Programming — Member (2 Seasons) *November 2024 – January 2025*

- Competed in problem-solving contests using C++ and attended weekly training sessions

CERTIFICATIONS

CompTIA IT Fundamentals (ITF+) *Active since July 2025, no expiration*

CompTIA Network+ (N10-009) *Active September 2026 – September 2029*

Digital Egypt Cubs Initiative, Level 2 (Udacity / MCIT, Egypt) *Completed November 2023*

PROJECTS

Home Network Security Project *2026*

- Repurposed legacy hardware (Intel Core i2 Duo, 2GB RAM) into an Ubuntu Linux server
- Deployed Pi-hole for network-wide ad and tracker blocking
- Configured WireGuard VPN for secure remote access
- Set up static IP, SSH remote administration, and UFW firewall rules
- Applied CompTIA Network+ concepts in a real-world implementation

E-Commerce Management System - ASP.NET MVC *2025*

- Engineered a full-stack e-commerce management system (ASP.NET MVC, C#, SQL Server) to streamline product catalog management, inventory tracking, and order processing
- Designed a relational database schema spanning 5+ core entity relationships, supporting admin dashboard reporting and sales analytics for data-driven decisions
- Implemented server-side security practices and core web architecture principles to protect application data and transactions

Web Application Security Labs - PortSwigger Web Security Academy & TryHackMe *2026*

- Practiced exploitation techniques across SQL Injection, Cross-Site Scripting (Reflected, Stored, DOM), IDOR, CSRF, Clickjacking, Broken Access Control, Authentication Bypass, and File Upload vulnerabilities through structured lab modules

Languages: Arabic (Native), English (B2–C1)
